Unlimited solutions for your terrace design

The BC Series adopts a new method of spacer tabs to separate pavers, inspiring creative architecture with inlimited possibilities.

Independent tabs are fixed to the head of the pedestal and with the unique 360° rotation, the space between pavers will match perfectly.

45°

Rectangular or square pavers

Triangular pavers

Hexagonal pavers

Triangular pavers

Pentagonal pavers

Claude
Buzon

Three decades of innovations

Thirty years ago, Claude Buzon revolutionized the world of terrace support systems by founding Buzon Pedestal International. Since then the family has grown and thrived: surrounded by his children Laure and Laurent, no fewer than four generations of pedestals have subsequently seen the light of day.

Our mission? To move heaven and earth to help our customers transform their outdoor spaces into the living spaces of their dreams.

We have achieved this success by building on solid foundations. Since its establishment in the Hauts Sarts enterprise park, our family company has never hesitated to reach out and now has 25 partners in more than 50 countries. Trust is one of our core values, and is reinforced during each mission: by taking time to listen to the client and rolling out each project with enthusiasm.

Although we offer stability solutions, we categorically reject the idea of standing

still. Innovation is one of Buzon's drivers, which incites us to develop ever more adapted and efficient products. In doing so, we place a special emphasis on the environment, in particular by using recycled raw materials and delivering 100% recyclable products.

In addition to reducing our carbon footprint, we are also compensating for it by planting trees in Madagascar. Today we are therefore proud to be able to have achieved carbon neutral status with our company.
